F-683 G

GUARANTEED ANALYSIS & SPECIFICATIONS

Calcium (Ca), weight %	10.00%
Magnesium (Mg), weight %	6.00%
Sulfur (S), weight %	5.00%
Boron (B), weight %	0.50%
Copper (Cu), weight %	3.00%
Iron (Fe), weight %	3.00%
Manganese (Mn), weight %	3.00%
Zinc (Zn), weight %	3.00%
Bulk Density, lbs. per cubic foot	85
Particle Size	90% -6 + 16 Mesh (-4 + 1 mm) 180 SGN
Physical Appearance	Gray Granules

PACKAGE & SHIPPING INFORMATION

Bulk, Bulk Bags, or 50 pound multiwall paper bags with PE liner	Plant location: Walnut Ridge, AR
---	----------------------------------

AGRONOMIC CONSIDERATIONS

A homogenous general-purpose micronutrient grade used by bulk blenders for preparing a complete fertilizer suitable for a broad range of crops and soil situations. Formulated as an acidic granule, which promotes immediate and long-term nutrient element availability. Relatively low bulk density for physical compatibility in a blend. Cost economics and agronomic performance of this grade are superior to those of a blend containing the same amounts of the contained micronutrients that are each added separately.

GENERAL RECOMMENDATIONS

Applications of this product should be based on soil test and/or leaf analysis results. Use a minimum of 50 pounds per ton, with higher amounts as necessary to meet crop needs and soil situations.

MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other materials to produce products whose total primary nutrient guarantees equal or exceed 24%.
