### AGRONOMIC CONSIDERATIONS

A homogenous grade of Copper oxide and sulfate with a low analysis to insure a better distribution throughout the fertilizer grade. Product analysis of 12% Copper provides ease of formulation in blends. Product supplies initial amount of Copper in sulfate form for immediate needs and oxide form for soil buildup and extended plant needs.

### GENERAL RECOMMENDATIONS

Applications of this product should be based on soil test and/or leaf analysis results. Use 8 pounds of F212G for every pound of Copper required to meet needs.

### MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other fertilizer materials to produce products to meet the nutritional needs of crops.
