

FRIT INDUSTRIES

F-312 G CORN MIX

GUARANTEED ANALYSIS & SPECIFICATIONS

Magnesium (Mg), weight %	10.00%
Sulfur (S), weight %	5.00%
Boron (B), weight %	3.00%
Zinc (Zn), weight %	12.00%
Bulk Density, lbs. per cubic foot	65
Particle Size	Minimum 90% -4 + 1.8 mm (-4 + 12 Mesh) 220 SGN
Physical Appearance	Gray-Brown Granule

PACKAGE & SHIPPING INFORMATION

Bulk, Bulk Bags, or 50 pound multiwall paper bags with PE liner	Plant location: Walnut Ridge, AR
-----------------------------------------------------------------	----------------------------------

AGRONOMIC CONSIDERATIONS

Readily available forms of micronutrients plus Magnesium and Sulfur for a balanced nutrient formula. Designed to provide a “best fit” for soil and plant requirements with emphasis on Zinc and Boron, which are critical elements for seedling growth and plant development. Also, well suited as a general mix for small grains and cotton fertilization.

GENERAL RECOMMENDATIONS

Use Zinc soil test as a guideline for amount to apply. Bulk apply about 10 – 25 pounds per acre (in a blend), or approximately 5 – 15 pounds per acre as a side banded fertilizer (also as a component of a blend).

MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other fertilizer materials to produce products to meet the nutritional needs of crops.
