AGRONOMIC CONSIDERATIONS

A granulated homogeneous micronutrient product designed for general purpose use on turf, sod crops, vegetables, row crops, and tree fruits. Residual acidity in the granule promotes long-term availability of contained nutrients. F503G is to be used only on crops which respond to molybdenum. Crops high in molybdenum are toxic to grazing animals (ruminants).

GENERAL RECOMMENDATIONS

Applications of this product should be based on soil test and/or leaf analysis results. Use as an ingredient of a bulk blend at a rate of 25 to 100 pounds per ton depending on total amount of material to be applied on an acre basis.

MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other fertilizer materials to produce products to meet the nutritional needs of crops.
