

FRIT INDUSTRIES

F-603 G

GUARANTEED ANALYSIS & SPECIFICATIONS

Sulfur (S), weight %	4.00%
Boron (B), weight %	1.30%
Copper (Cu), weight %	2.70%
Iron (Fe), weight %	5.30%
Manganese (Mn), weight %	2.70%
Molybdenum (Mo) weight %	0.03%
Zinc (Zn), weight %	2.70%
Bulk Density, lbs. per cubic foot	90
Particle Size	Minimum 90% -4 + 1.8 mm (-4 + 12 Mesh) 200 SGN
Physical Appearance	Brown Granules

PACKAGE & SHIPPING INFORMATION

Bulk, Bulk Bags, or 40 pound multiwall paper bags with PE liner	Plant location: Walnut Ridge, AR

AGRONOMIC CONSIDERATIONS

A homogeneous general-purpose micronutrient grade used by bulk blenders for preparing a complete fertilizer suitable for a broad range of crops and soil situations. Formulated as an acidic granule, which promotes immediate and long-term nutrient element availability. Relatively low bulk density for physical compatibility in a blend. Cost economics and agronomic performance of this grade are superior to those of a blend containing the same amounts of the contained micronutrients that are each added separately. F603G is to be used only on crops which respond to molybdenum. Crops high in molybdenum are toxic to grazing animals (ruminants).

GENERAL RECOMMENDATIONS

Applications of this product should be based on soil test and/or leaf analysis results. Use a minimum of 50 pounds per ton, with higher amounts as necessary to meet crop needs and soil situations.

MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other fertilizer materials to produce products to meet the nutritional needs of crops.
